The Future is Now: Join Us to Tour High Tech APS Training Facility

Join your friends and business associates from the Facility Manager Association of New Mexico at 3:00 pm sharp on Wednesday, June 19th, 2019 for an onsite facility tour of the high-tech Berna Facio Teacher and Professional Development Facility located at 3315 Louisiana NE, Albuquerque, NM. The 47,000 square foot facility, completed in late 2018, is a state-of-the-art training resource building featuring the latest innovative electronic media integration to deliver modern, seamless methodology for information sharing for thousands of Albuquerque Public Schools teachers and staff.

Our tour guide for this adventure is John Dufay, Executive Director, Maintenance and Operations for APS. John oversees an inhouse staff of 150 and utilizes over 80 outside suppliers in his daily quest to provide a seamless facilities experience for the staff and students in the state's largest school district. John was involved in the project from the initiation when the Montgomery School, constructed on the site in 1955 (later transformed into an APS administrative building) was demolished and the new building brought out of the dirt.

We will see state of the art lighting systems with audio visual integration to facilitate large presentations in the main auditorium. The building's spacious mechanical room features the latest technology in HVAC and electrical gear, providing the the heart and soul of this multi- purpose building.

The tour leaves promptly at 3:15 pm and for security reasons, late arrivals will not be able to join the group. Park on the south side of the building and enter through the southwest lobby of the facility. Plan to be onsite and on time to be included. Cost for this event is \$30.00 for members and \$35.00 for non-members and guests. Register and pay with your credit card online before Monday, June 17th to assure your attendance.

LAST CALL FOR GOLF: SIGN UP TODAY TO PLAY

The deadline to register for the scholarship fundraising event of the year for facility managers and their dedicated suppliers is fast approaching but there is still time to join these preeminent companies in supporting our 9th Annual Golf Tournament on Friday, July 19th, 2019, at the Isleta Eagle Golf Course.

Go online today to www.fmanm.com to register and pay with your credit card. See you at this great annual event!

Free-Spirited Golf Helpers Needed

Hi there! Want to rock your company logo'd golf shirt in front of about 130 facility managers? Get on the map? Get noticed? Then please let me know TODAY that you will help me as we launch our annual golf tournament into orbit on Friday morning, July 19th, 2019.

Here's a secret: The golf gang has as much or maybe more fun than the players. I need you to show up at 7 am at the beautiful Isleta Eagle Championship Golf Course Club House armed with scotch tape, a big smile, and the willingness to help run signs out onto the course, refill the coffee pot, arrange the door prize table, or whatever else it takes to get the guys and gals onto the greens so we can enjoy ourselves too. Then we commandeer golf carts and drive around, analyzing the proceedings. Really, it is a blast.

Send me an email today and let me know you are coming. I WANT YOU!

FMANM Vision Statement: Establish and implement an organization to promote education, information, solutions and opportunities associated with the operations, maintenance, and sustainability of facilities.

High Flying Gravity Defying Drones Escalated May Meeting

Members and guests of the Facility Manager Association of New Mexico gathered on a sunny balcony overlooking the iconic Anderson Abruzzo Albuquerque Balloon Museum to witness a flying demonstration and gather information on the latest technical applications for drone technology in facility management and monitoring.

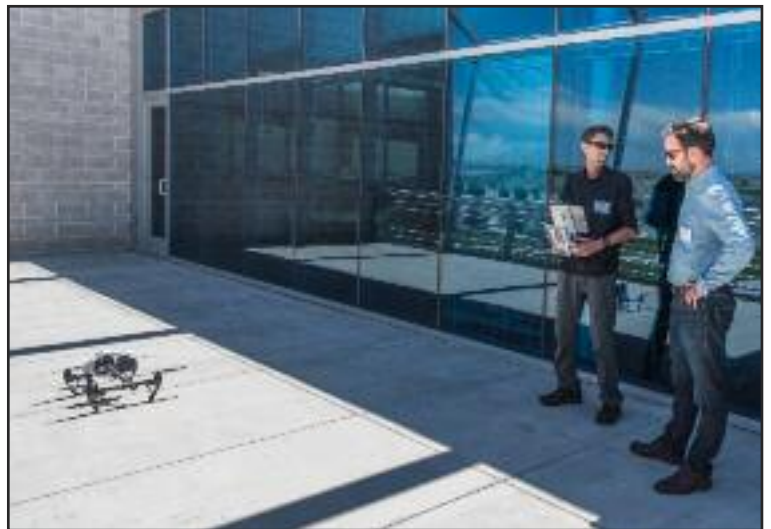

Jesse Sansom, drone pilot, designer and graphic artist with the Colibri Media House, provided a brief historical perspective on the early development of these unmanned aerial vehicles, beginning with early applications for offensive uses, development by the military in World Wars I and II, and into the modern age with advances in solar powered and recreational

uses for today's drones.

And today? "Facility managers and property owners can now to accurately survey acres of property within days, not weeks, and 3D modeling allow you to take measurements that are accurate within inches, eliminating the guesswork with Google Earth-type services. It is possible to obtain real time data to monitor facility structure, rooftop conditions, and to view every square inch of your property without leaving your desk," he said. He also gave an update on the latest on laws and regulations for commercial drone operations and guided attendees with some expert tips for hiring legal, reputable, professional drone operators.
